Product Manager · AI & Enterprise Technology

PROFESSIONAL SUMMARY

Consultant-turned-product-builder with 5+ years of hands-on PM experience across 0→1 AI platforms and multi-workstream enterprise delivery — owning full product lifecycle, Agile execution, and client engagement. Built and shipped production AI features (LLM agents, anomaly detection, AI email automation); actively applied AI-assisted delivery tooling as a force-multiplier across a \$6M+ retail tech engagement. CS-trained (UVA, 3.9 GPA). Targeting PM roles at AI-first companies where technical depth and bias for execution matter.

EXPERIENCE

Associate | PM & Product Delivery Lead · Oliver Wyman · Washington, DC

Sep 2021 – Present

Retail Promo Optimization (FLO Tool), PM Lead · ~\$18B Canadian grocery retailer · 2026

- Applied Claude Code AI skills and MCP-based SQL Server integrations in daily PM and development work — used AI-assisted tooling for sprint testing (Playwright), reporting reconciliation across UI/Power BI/SQL, SQL ticket diagnostics, and cross-repo debugging across a 4-banner, multi-repo codebase, accelerating delivery throughout the engagement.
- PM lead for \$~6M retail promo-optimization engagement (~\$18B Canadian grocery retailer) — expanded FLO tool from a 1-banner pilot to 4 retail banners across grocery and discount formats, including full French-language deployment.
- Owned 10-sprint agile roadmap (~25 user stories): multi-tenant banner rollout, 17 new coupon/promo types, and wholesale forecasting; managed 1.5 FTE dev team and ran full scrum cadence (demo / UAT / staging / prod) with the client's merchandising and IT teams.
- Hands-on SQL and code contributor: authored cross-banner diagnostic queries across 4 banner databases; direct code commits to production repo (French translation PRs, stored proc refactors enabling cross-banner coupon redemption-rate modeling).

The Hub — 0→1 AI-powered transformation management platform · 5 enterprise clients · ~100 MAUs each

- Owned full product lifecycle for The Hub (0→1 AI platform), scaling to 5 enterprise deployments including the most complex build to date (top-10 U.S. regional bank); day-to-day client contact across 3 simultaneous deployments.
- Shipped production AI features end to end: LLM-based in-product assistant (~90% adoption across all deployments), predictive anomaly detection, and AI email agent trained on client communication history — 0-to-1 builds from concept to production.
- Cut reporting prep from ~1 week to near-instant dashboard refreshes; drove ~50–60% automation across governance, alerts, and approvals — reducing program lead data entry to ~1 hr/week; co-developed Hub 2.0 AI roadmap securing next-gen platform funding.
- Led 5 consultants and 3 contractors/developers across overlapping engagements; deliberately built team capability to operate as independent client SMEs.

Program Manager — Modern Workplace · Microsoft · Washington, DC

Sep 2020 – Sep 2021

- Led a 10-person team through a Fortune 50 (\$110B+) IT divestiture; managed \$6M in engagement funds and monthly contractual amendments — building stakeholder alignment and delivery discipline core to senior PM work.
- Owned prioritization of a ~20K-item Azure DevOps backlog using impact/effort frameworks; negotiated retention of a ~\$0.5M workstream averting >\$1M in revenue loss.

EDUCATION

University of Virginia · B.A. Computer Science & Entrepreneurship · With Distinction · Phi Beta Kappa · 3.9 GPA

May 2020

SKILLS & CERTIFICATIONS

AI / Product: LLM product integration · AI agent development · 0→1 product development · Roadmapping · OKRs/KPIs · User research · A/B testing · Instrumentation

Execution: Agile/Scrum · Sprint planning & backlog grooming · RAID & change control · C-suite stakeholder communication · Multi-workstream delivery governance

Technical: Python · SQL · Claude Code · MCP integrations · Java · C/C++ · R · HTML/CSS · Jira · Trello · Azure DevOps · Power BI · UI/UX Design

Certifications: Certified Associate in Project Management (CAPM) · Bloomberg Market Concepts
